## Data Sheet: Hypoxyprobe™ Red549 Antibody

Description:	Mouse IgG <sub>1</sub> monoclonal antibody conjugated to Dylight™549 fluorophore (HP-Red549).
Specificity:	Pimonidazole forms adducts with thiol containing tissue proteins at pO <sub>2</sub> ≤ 10 mm Hg. HP-Red549 binds to pimonidazole adducts in hypoxic cells in tissue and tissue culture.
Format:	Each vial of HP-Red549 contains the antibody dissolved in 200 microliters of stabilized diluent at a concentration of approximately 0.5 mg/mL.
Product Type:	Fluorophore conjugated IgG <sub>1</sub> mouse monoclonal antibody (clone 4.3.11.3)
Fluorophore Protein Ratio:	≥4 Dylight549 per IgG1 molecule.

## Product Details

Applications:	Flow cytometry and immunofluorescence on frozen tissue sections. HP-Red549 is designed as an alternative to FITC labeled anti-pimonidazole mouse monoclonal antibody <sup>1</sup> . Unpublished data indicate that HP-Red549 serves this purpose well. A dilution of 1/20-1/200 is suggested as a working guide only. It is recommended that users titrate the product for use in their system using appropriate negative and positive controls. Target Species:	All.
Product Form:	Purified IgG <sub>1</sub> prepared by affinity chromatography
Buffer:	Proprietary formulation containing stabilizers.
